

CORNÉ VAN DE SANDE | SENIOR ADVISOR

NEO

Company Profile

NEO's mission is to provide everyone with useful and up-to-date geo-information from imagery. In 2018 it is totally unnecessary to use outdated geo-information, because there is so much imagery from satellites, aircraft, mobile phones, etc. that it is well possible to secure and update information using these sources. It is our core business to provide this information and to help you in keeping this information up to the standards you require. In agriculture NEO provides monitoring solutions for the Common Agricultural Policy and precision agriculture.

Biography

At NEO Corné van der Sande's role is a senior advisor earth observation for the rural environment and agribusiness. He has a strong position in the remote sensing sector related to agricultural monitoring in the Netherlands and (outside) EU for CAP and precision agriculture. He is working at NEO since 2004 and he had several roles in the company. His strongest point is that he can chop a complex project into understandable pieces. With these pieces he gives direction to team members in an agile way of working and manages expectations to the client. He is above all keen on new developments and the implementation of it.
