

## FABIO SLAVIERO | SENIOR CONSULTANT

*Abaco SpA*

---

Fabio Slaviero brings over 25 years of vision, experience and responsibility servicing as a business analyst, project manager, sales engineer, development team lead, technical/functional architect and application developer. As a Senior Consultant, Fabio led numerous consulting engagements to implement complex e-Business and e-Agriculture solutions. Fabio's focus throughout his career has been aligning technology with business needs.

Fabio Slaviero today's responsibility within Abaco is mentoring and business development around Integrated Administration and Control Systems (IACS) as a new generation of ERP that embeds geospatial information and therefore renamed TRP (Territory Resource Planning). He has been involved in Consultancy, mission critical assessment and delivery of CAP and Agriculture information systems in England, Wales, Scotland, Malta, Turkey, Azerbaijan, and Georgia among others. He also responsible for Abaco's relationships with the EU Commission, European Paying Agencies and Coordinating bodies.

Abaco helps public and private companies in the building and effective utilisation of spatial-enabled management information systems through accurately designed pre-packaged software solutions, that allow to focus on processes, without the need to think on widely accepted standards implementations. Abaco markets an end-to-end Integrated Administration and Control System, also known as IACS, which covers all requirements for managing land-based farmers subsidies and an agri-food platform implementing a Decision Support and Farm Management system.
