

PIOTR WOJDA | POLICY OFFICER

European Commission – DG Agriculture and rural development

Piotr Wojda received PhD in Engineering from University of Liege in Belgium and MSc degrees in Geology and in Economics from Warsaw University and Warsaw School of Economics in Poland respectively. He joined the European Commission's science establishment in 2009, working primarily on geographical data seamless exchanges in the framework of Integrated Administration and Control Systems (IACS) and Land Parcel Identification Systems (LPIS). Since 2015 he has joined the Commission's Directorate General for Agriculture and rural development, working on policy development, implementation and support, focusing mainly on new technologies in the Earth observation domain applied to agriculture. He likes bridging different domains and people.
