

## **SIMON KAY | SENIOR EXPERT**

*European Commission – DG Climate Action*

---

Simon Kay received MSc and PhD degrees in Geography from University College London, and joined the European Commission's science establishment in 1995, working primarily on agricultural policy support. Since 2013, he has worked as Senior Expert in the Commission's Directorate General for Climate Action on policy development and implementation, focusing on the role of agriculture, forestry and land use change. He has played an active part in the EU and international land sector and biomass debate, the EU's recent regulatory proposal on Land Use, Land Use Change and Forestry – the 3<sup>rd</sup> pillar of the 2030 Climate policy package – and on linkages with the bio-economy through the use of biomaterials and feedstocks for the purpose of climate change mitigation.
