

## SVEN GILLIAMS | SENIOR SCIENTIST & TEAM LEADER AGRICULTURAL APPLICATIONS *VITO*

---

Sven Gilliams is an agricultural engineering in Land and Forest Management and has been working on remote sensing applications for agricultural monitoring for the past 20 years.

MONITORING OF AGRICULTURE AROUND THE WORLD IS CRUCIAL FOR FEEDING THE GROWING POPULATION.

In 2005, Sven joined the VITO Agriculture R&D Unit, working on the Global Monitoring for Food Security project. At that time his main responsibilities were medium resolution agricultural monitoring; the development of low- and medium-resolution-based early warning services, and providing support for national ministries, the UN FAO, UN WFP. Sven has served as project leader on several major projects. At present, he is the team leader of the Agricultural Applications group, a team of 10 experts working on agricultural projects ranging from global agricultural monitoring to local precision farming, and part of the GEOGLAM executive committee.
