

HEATHER NEEDHAM

Winner "Student essay competition"

MSc Biodiversity Conservation and management | University of Oxford

Heather is a recent BSc Geography (with Geocomputation and Spatial Analysis) graduate from King's College London. During her bachelor's degree, she secured funding from the Royal Geographical Society (with IBG) to install of FreeStations (low-cost monitoring sensors) in the Colombian Andes to understand ecosystem services from tropical montane cloud forests. Inspired by this research, she used satellite data to investigate the impacts of post-conflict development on deforestation within Colombia and protected areas for her undergraduate dissertation. After graduating, she worked as a policy advisor on the Environmental Principles and the Habitats Regulations Assessment at the Department for Environment, Food and Rural Affairs. She currently reading an MSc in Biodiversity Conservation and Management at the University of Oxford.
