

RONAN MCEVOY

Project Manager | The Icon Group

Ronan joined Icon in 2016 and holds a MSc. in GIS and Remote Sensing. Ronan has several years experience in management, being involved with various projects across different management levels. Recently Ronan has managed our Livestock Detection project, where remotely sensed satellite imagery and AI are fused to detect and identify livestock in open pasture in Northern Ireland. Ronan has also managed our Control with Remote Sensing project, where Icon provide an annual validation of applications for an aggregate of €2 billion worth of subsidies delivered through the Common Agricultural Policy.
