

TESSA BUCKLEY

Runner up "Student essay competition"

Undergraduate student | University of Reading

Tessa is an undergraduate student studying at the University of Reading in her third year. She is undertaking an Environmental Science BSc with particular interest and enthusiasm in the remote sensing projects she has completed so far, including monitoring mangroves with NDVI and algal bloom in the Gulf of Finland. More recently Tessa has begun her dissertation project on mapping NDVI in three UK cities as an effect of the COVID-19 lockdown. Her next steps are to further her research following university in earth observation and GIS as well as promote her enjoyment and ideas of sustainable living.
