

Jere Kaivosoja
Senior Scientist | Natural Resources Institute Finland

Dr. Jere Kaivosoja works as a senior scientist in Natural Resources Institute Finland (LUKE). His background is in GIS and remote sensing and his research area involves technologies related to precision farming. Since 2010, his research has focused on drone related applications in agriculture. In addition, he currently operate with several different drone systems including spraying drones. He is working on an EU project called Flexigrobots, where he studies the role of spraying drones in future farm automation. LUKE is a non-profit research organization, working also with spraying related regulations and certifications.
